

**Republican for**  
**States' Rights**  
**Individual Liberty**  
**Fiscal Responsibility**  
**Congress**

- **National Defense-** We cannot be serious about security if we maintain open borders. Arizona is plagued by violent drug cartels as a direct result of the unsecured borders.
- **Energy Independence-** Barriers to free enterprise in energy must be stopped. The federal government has no right to restrict states from drilling oil who wish to do so.
- **Healthcare-** In the 1960's, Europe led the development of new medicines. Following socialization of their health care, we became the leader of new development and testing. We must not sacrifice a system that works for many, with a system that may work for none.
